Weight	34.00–40.00 kg (75–88 lbs)
Color	silver (aluminum) or black
Accessories	vario corners that flex $\pm 60^\circ$, fixed outward/inward corners in 22.5° – 90° , elements for multicore cable runs, access gate units in various sizes, bar counters
Transport	10 standard units per transport crate; approx. 36 transport crates per 45 ft trailer (approx. 436.00 m/1,430 ft overall length)

Applications

GIGS stage barriers provide heavy-duty protection for stages, mixers, and follow-spot positions. They can also be used to divide large audiences into sections or pens to safeguard against potentially dangerous crowd surges.

Features

GIGS products have a sturdy, modular design. Standard units can be bolted together or combined with GIGS security gates, as well as specialized elements to accommodate unusual stage configurations and cable runs. GIGS barriers are load tested and meet all relevant international safety regulations.

Optional Extras

We provide either dry hire or a fully installed and removed service.

GIGS Stage Barriers

On-site applications

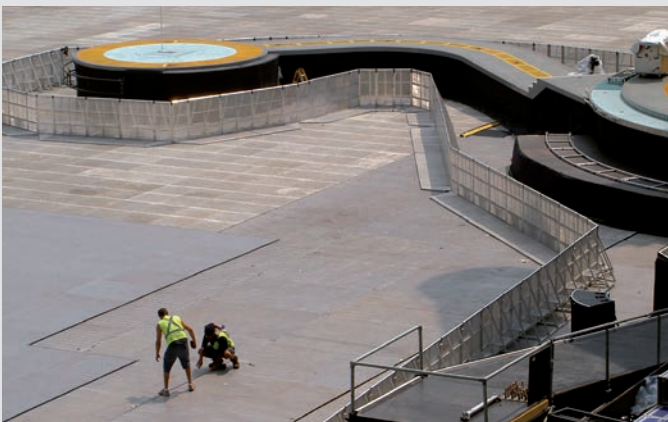

GIGS front-of-stage barricades, Rheinkultur Festival, Bonn, Germany
